

Patient NAME : Mr CHANDAN NAG
 DOB/Age/Gender : 54 Y/Male
 Patient ID / UHID : 12540238/OF12540238
 Referred BY : Self
 Sample Collected : May 23, 2025, 06:59 PM

Report STATUS : Final Report
 Barcode NO : RL01715040
 Sample Type : Serum
 Report Date : May 25, 2025, 12:21 PM.

Test Description	Value(s)	Unit(s)	Reference Range
------------------	----------	---------	-----------------

HIV 1&2 Antibody, Qualitative

HIV I & II Qualitative & P24 COMBO CMIA	0.12	S/CO	<1.00 :Nonreactive >1.00 :Reactive
--	------	------	---------------------------------------

Interpretation:

The cutoff is 1.00 S/CO.

S/CO	Reference Ranges
< 1.00	Nonreactive
≥ 1.00	Reactive

Final Interpretation

Initial Interpretation	Results with Retes	Final Interpretation
Nonreactive	No retest required	Nonreactive. HIV p24 Ag and/or HIV-1/HIV-2 Ab not detected.
Reactive	If both retest results are < 1.00	Nonreactive. HIV p24 Ag and/or HIV-1/HIV-2 Ab not detected
	If one or both retest results are ≥ 1.00	Reactive. Presumptive evidence of HIV p24 Ag and/or HIV-1/ HIV-2 Ab; perform a supplemental assay

1. Non-Reactive result implies that no Anti HIV-I OR HIV-II Antibodies have been detected in the sample by this method. This means that either the patient has not exposed to HIV-I or HIV-II infection or the sample has been tested during the "WINDOW PHASE"(before the development of detectable levels of antibodies). Hence negative result does not exclude the possibility of exposure to or infection with HIV-I/HIV-II.
2. Immunoassay for the in vitro qualitative determination of HIV-1 p24 antigen and antibodies to HIV-1, including group O, and HIV-2 in human serum
3. It is a screening test and reactive samples need to confirmed by alternate method like western blot or PCR
